New - Allergy Progress Report For patients previously tested and treated.

The Allergy Progress Report is designed for patients that have previously been tested and treated with Bio-Medical Services. The purpose of this service is to monitor the pet's progress on immunotherapy treatment, and identify newly emergent allergens. Each patient's case is reviewed by our staff immunologist, and a revised treatment summary is included. To re-test your patient, see the reverse side of this form for details and **discount pricing** information. This service is available for canine, feline and equine patients. **Select desired services above.**
